

## **Program Specification**

Program Name: Mathematical ScienceQualification Level: Bachelor of Mathematical ScienceDepartment: Mathematical ScienceCollege: College of ScienceInstitution: Princess Nourah Bint Abdulrahman University

## Content

| A. Program Identification and General Information | 3  |
|---|----|
| B. Mission, Goals, and Learning Outcomes          | 4  |
| C. Curriculum                                     | 7  |
| D. Student Admission and Support:                 | 11 |
| E. Teaching and Administrative Staff              | 13 |
| F. Learning Resources, Facilities, and Equipment  | 14 |
| G. Program Management and Regulations             | 15 |
| H. Program Quality Assurance                      |    |
| I. Specification Approval Data                    | 22 |

## A. Program Identification and General Information

#### **1.** Program Main Location:

College of Science - Building 121-Main College Campus - Princess Nourah Bint Abdulrahman University – Riyadh.

#### **2.** Branches Offering the Program:

College of Science – Mathematical Science department.

#### **3.** Reasons for Establishing the Program:

(Economic, social, cultural, and technological reasons, and national needs and development, etc.)

- Providing the labor market with academically qualified female employees who have the ability to apply mathematical, numerical and numeracy skills.
- Providing research centers with qualified women cadres with mathematical foundations and theories in support of various science research.
- Contribute to filling the need of statistics centers with female cadres who have the ability to statistical analysis and solve life problems.

The higher education of women in the Kingdom of Saudi Arabia received a great deal of care and attention that enabled her to take a confident step towards achieving her aspirations and showing their distinction in the field of Mathematical sciences and its applications.

#### 4. Total Credit Hours for Completing the Program: (131 Credit Hours)

#### **5.** Professional Occupations/Jobs:

- Work (researcher research assistant) in research centers that depend on mathematics and its branches.
- Work in public and private sector institutions that require mathematical and statistical skills such as the Ministry of Finance, the Saudi Monetary Agency, banks, the General Statistics Authority, the Social Insurance Corporation, insurance companies, telecommunications companies, the Ministry of Health, the Ministry of Education, Education and Training evaluation commission.
- Teaching mathematics in general education institutions.

| 0. Major Track/rathways (II ally).        | Credit hours     | Professional Occupations/Jobs |
|---|------------------|-------------------------------|
|   | (For each track) | (For each track)              |
| 1. Mathematics                            | 131              | It is illustrated above       |
| 7. Intermediate Exit Points/Awarded Degre | e (if any):      |                               |
| Intermediate exit points/awarded degree   |                  | Credit hours                  |
| None                                      |                  |                               |

## **B.** Mission, Goals, and Learning Outcomes

#### **1.** Program Mission:

The mathematics program contributes to enriching society and the knowledge economy by qualifying graduates in the field of mathematics and providing them with critical thinking skills, data processing and problem solving using mathematical methods and modern programs, through a high-quality educational environment.

#### 2. Program Goals:

- 1. Providing the graduate with mathematical knowledge and skills and qualifying them scientifically and practically.
- 2. Enabling the graduate to use modern programs and technologies in the field of mathematics.
- 3. Providing the graduate with the basic research skills such as analysis, conclusion and problem solving.
- 4. Developing effective communication skills and working within a team for the graduates to contribute to community service.
- 5. Providing the graduate with the skill of self-learning, which enables her to continuously develop.

**3.** Relationship between Program Mission and Goals and the Mission and Goals of the Institution/College.

#### 4. Graduate Attributes:

- The breadth and depth of knowledge of theories and professional foundations and developments in the field of specialization.
- Ability to apply knowledge in the field of specialization.
- Ability to effectively use modern technology.
- Ability to employ knowledge in research, investigation and problem solving in an innovative way to develop personal skills and self-development and continuing education in light of the variables.
- Ability to invest skills and experience gained in entrepreneurship to contribute to economic development.
- Ability to communicate effectively in both Arabic and English in the social and professional context.
- Pride in national identity, professional values and respect for other cultures.
- Initiating volunteer and community work.

## **5.**Program learning Outcomes\*

| Know       | edge and Understanding  |
|------------|---|
| K1         | Describe methods for solving mathematical problems and equations                        |
| K2         | Distinguish basic concepts in mathematics and statistics                                |
| К3         | Recall the texts of the basic mathematics theories                                      |
| K4         | Describe the mathematical logic and methods of proof                                    |
| Skills     |   |
| <b>S1</b>  | Build and use mathematical models to represent real-life problems                       |
| S2         | Use mathematical logic in deduction and proof   |
| <b>S</b> 3 | Choose appropriate strategies for solving mathematical problems, apply and compare them |
| S4         | Analyze and discuss the results and mathematical procedures used orally or in writing.  |
| <b>S</b> 5 | Use modern computer technologies and software in solving mathematical problems          |
| Values     | 8   |
| V1         | Appropriately manage tasks and work within a team to achieve certain goals              |
| V2         | Ability to take responsibility, learn and work independently                            |

\* Add a table for each track and exit Point (if any)

## C. Curriculum

#### **1.** Curriculum Structure

| Program Structure            | Required/<br>Elective | No. of courses | Credit<br>Hours | Percentage |
|------------------------------|-----------------------|----------------|-----------------|------------|
| Institution Description onto | Required              | 8              | 18              | 13.7%      |
| Institution Requirements     | Elective              | None           | -               | -          |
| College Dequinements         | Required              | 5              | 15              | 11.4%      |
| College Requirements         | Elective              | 1              | 2               | 1.5%       |
| <b>Drogrom Doguinomenta</b>  | Required              | 19             | 73              | 56%        |
| Program Requirements         | Elective              | 4              | 12              | 9.16%      |
| Capstone Course/Project      | Required              | 1              | 3               | 2.29%      |
| Field Experience/ Internship | Required              | -              | -               | -          |
| Others                       | Free                  | 3              | 8               | 6.1%       |
| Total                        |                       | 41             | 131             | 100%       |

\* Add a table for each track (if any)

## **D. Student Admission and Support:**

#### **1.** Student Admission Requirements

Mathematical Science program has approved and publicly disclosed criteria and requirements for the admission and registration of students that are appropriate to the nature of the program, and are applied fairly as shown in the following links:

https://documentcloud.adobe.com/link/track?uri=urn%3Aaaid%3Ascds%3AUS%3A804afe7a -12f2-40f7-a6d5-0038be5e62c2

https://www.pnu.edu.sa/en/Pages/BacaloryaPrograms.aspx

#### 2. Guidance and Orientation Programs for New Students

Mathematics program provides comprehensive orientation for new students, ensuring their full understanding of the types of services and facilities available to them. Also, the program informs students about their rights and duties, the code of conduct, and grievance, complaints, and discipline procedures, using a variety of means; and applies them fairly as shown in the following links:

https://documentcloud.adobe.com/link/track?uri=urn%3Aaaid%3Ascds%3AUS%3Aa9f7b93 8-2b18-41c7-a943-cab0555aebe6

https://www.pnu.edu.sa/en/Pages/StudentHosting.aspx

 $\frac{https://documentcloud.adobe.com/link/track?uri=urn\%3Aaaid\%3Ascds\%3AUS\%3Ad043aed}{5-6f25-4680-a191-7b959c5350ff}$ 

https://www.pnu.edu.sa/en/Deanship/studaffairs/Pages/SkillRegist.aspx

#### **3.** Student Counseling Services

(academic, career, psychological and social)

- Students are provided with effective academic, professional, psychological, and social guidance, and counselling services through qualified and sufficient staff. <u>https://www.pnu.edu.sa/en/deanship/studaffairs/pages/socialunit.aspx</u>
- Mechanisms are applied to identify gifted, creative, talented, and underachieving students in the program, and appropriate programs are available to care for, motivate, and support each group of them.

https://www.pnu.edu.sa/ar/ViceRectorates/VRCSED/Documents/3172019/Support.pdf

- Students in the program are offered extracurricular activities in variety of fields to develop their abilities and skills, and the program takes appropriate actions to support and motivate their participation.
- The students and alumni of the program are provided with additional activities for their professional development, consistent with the intended learning outcomes, and labour market developments.
- The program implements effective procedures to monitor students' progress and to verify their fulfilment of graduation requirements.

#### **Complete process of academic advising:**

- Determine an academic guide for each student
- Announcing the names of students on the offices of instructors and Member Tables
- Lists of female guides and their students at the Academic Advising Unit in the department and college
- Provide guidance tools (teaching plan, plan balancing, university calendar, study schedules, reference numbers, tree drawing)
- Early guidance
- Academic Advising Platforms
- Activating the role of academic guidance friends in the educational departments
- Do not modify the first and second level tables
- Inform the Guides of the closed groups
- Upload unresolved cases to the Deanship of Admission and Registration
- Inventory of defaulters
- Students expected to graduate
- Activating the periodic meetings of the instructors with their students
- Headquarters for Academic Advising Unit
- Submit the guidance report by the college to the Deanship

#### 4. Special Support

(low achievers, disabled, gifted and talented)

• Mathematical science program applied mechanisms to identify gifted, creative, talented, and underachieving students in the program, and appropriate programs are available to care for, motivate, and support each group of them as shown in the following link

https://www.pnu.edu.sa/en/Pages/Scholarships.aspx

- The students in the program are offered extracurricular activities in variety of fields to develop their abilities and skills.
- The program implements an effective mechanism to communicate with its alumni and involve them in its events and activities, explore their views, and benefit from their expertise and support; and provides updated and comprehensive databases about them. Effective mechanisms are applied to evaluate the adequacy and quality of services provided to

normal students and special needs students and measure their satisfaction with them; and the results are used for improvement.

## E. Teaching and Administrative Staff

#### 1. Needed Teaching and Administrative Staff

The following link shows the teaching and administrative staff in the program <u>https://drive.google.com/drive/folders/19Y4C3udkSCuRVZsVu\_e2zPMmLl-3JH0u?usp=sharing</u>

#### 2. Professional Development

#### 2.1 Orientation of New Teaching Staff

Describe briefly the process used for orientation of new, visiting and part-time teaching staff

- The program provides appropriate orientation for new and adjunct teaching staff to ensure their understanding of the nature of the program, their rights, tasks, responsibilities, and workload.
- The Deanship of Training and Development conducts various workshops for newly appointed members to develop their skills in modern teaching methods and assessment methods.
- There are induction seminars at the beginning of the academic year to assist members to understand the nature of the program and their responsibilities towards it.
- Recently, The Deanship of Academic Development has established a program of excellence in teaching and learning for newly appointed faculty members, and the program has been prepared based on the tasks of faculty members in
  - Teaching
  - Scientific Research
  - Community Service
    - Introducing newly appointed faculty members to the regulations, regulations, and organizational procedures in force at the university
    - Introducing university agencies, deanships and facilities
    - Solve problems directly with the concerned authorities
    - The appropriate setting to enter the university's work system

https://documentcloud.adobe.com/link/track?uri=urn%3Aaaid%3Ascds%3AUS%3 Aeff311b6-8ce9-4e6b-8e2a-405e98dad4f7

- The program provides appropriate orientation for new and adjunct teaching staff to ensure their understanding of the nature of the program, their rights, tasks, responsibilities, and workload.
- The Deanship of Training and Development conducts various workshops for newly appointed members to develop their skills in modern teaching methods and assessment methods.
- There are induction seminars at the beginning of the academic year to assist members to understand the nature of the program and their responsibilities towards it.
- Recently, The Deanship of Academic Development has established a program of excellence in teaching and learning for newly appointed faculty members, and the program has been prepared based on the tasks of faculty members in
  - Teaching

- Scientific Research
- Community Service
  - Introducing newly appointed faculty members to the regulations, regulations, and organizational procedures in force at the university
  - Introducing university agencies, deanships and facilities
  - Solve problems directly with the concerned authorities
  - The appropriate setting to enter the university's work system

https://documentcloud.adobe.com/link/track?uri=urn%3Aaaid%3Ascds%3AUS%3Aeff311 b6-8ce9-4e6b-8e2a-405e98dad4f7

#### 2.2 Professional Development for Teaching Staff

Describe briefly the plan and arrangements for academic and professional development of teaching staff (e.g., teaching & learning strategies, learning outcomes assessment, professional development, etc.)

- There are workshops and training courses periodically to develop faculty members professionally
- Encourage teaching staff to attend and participate in conferences and seminars
- The teaching staff participates in professional and academic development programs in accordance with a plan that contributes to the development of their performance.
- Using the results of the courses questionnaires to improve performance of the teaching staff.

## F. Learning Resources, Facilities, and Equipment

#### **1.** Learning Resources.

Mechanism for providing and quality assurance of learning resources (textbooks, references and other resource materials, including electronic and web-based resources, etc.)

- Mathematical Science program implements clear policies and procedures that ensure the adequacy and appropriateness of learning resources and services provided to support student learning and implements effective procedures for the management of resources and reference materials needed to support teaching and learning processes.
- The library has enough various resources that are easily accessible and appropriate to the needs of the program and the number of students; are made available in adequate and appropriate times for female student section; and are updated periodically. Recently, the working hour of the central library is extended to 11 pm for all working days and make Saturday as specific day for male from 10 am 4 pm.
- Mathematical Science program has specialized electronic resources, such as, an available digital reference in digital library and software in computer labs, and appropriate databases and electronic systems that allow beneficiaries to access the information, research materials, and scientific journals from within or outside the institution via blackboard.

#### **2.** Facilities and Equipment

(Library, laboratories, medical facilities, classrooms, etc.).

• The program has suitable classrooms (each classroom has smart and normal boards and I-podium) and facilities for its needs.

- The program has 6 laboratories (computer labs), each lab has 24 personal computers and technology equipment (smart and normal boards and i-podium), that are suitable to the specialty and sufficient to conduct research and scientific studies according to the program goals; and applies appropriate mechanisms to maintain and update them.
- All health, and general and professional safety requirements are available in the facilities, equipment, and the educational and research activities.
- The program has facilities, equipment, and services suitable for those students, teaching staff, and employee with special needs. Most of comfortable facilities are available for staff and students, such as metro, coffee machines, prayer and rest places, and health and gym services.
- The program evaluates the effectiveness and efficiency of learning resources, facilities, and equipment of all types and evaluate by using frequent questionnaires; and the results are used for improvement.

**3.** Arrangements to Maintain a Healthy and Safe Environment (According to the nature of the program )

- The security and safety systems are provided to the facilities by the Safety and Security unit in the University.
- The College has emergency plans, safety signs, emergency exit signs and laboratory safety manuals.
- Preparing a fire evacuation plan periodically
- First aid kits are available.
- The College has emergency plans, safety signs, emergency exit signs and laboratory safety manuals.

## **G. Program Management and Regulations**

#### **1.** Program Management

#### **1.1 Program Structure**

(including boards, councils, units, committees, etc.)

Program Specification

#### **1.2** Stakeholders Involvement

Describe the representation and involvement of stakeholders in the program planning and development. (students, professional bodies, scientific societies, alumni, employers, etc.)

Mathematical sciences program starting to be more efficient to assess its attributes and its learning outcomes using program courses.

- In selecting program courses for assessment, it is critical to start with the faculty members who are more motivated. Those members not only would help to move the process forward, but also would be beneficial in the following years of assessment to train other faculty members. Assessment methods Assessment methods (or tools) are classified into two categories. Direct methods and indirect methods. Assessment requires that each attribute (outcome) is assessed by one or more direct methods, but a meaningful assessment would use both direct and indirect methods. Direct methods allow the direct examination or observation of student knowledge or skills associated with the indicators. The indirect methods assess opinions or self-reports to indicate student abilities. Examples of indirect methods include exit interviews, alumni surveys, and archival records. Highlights of the assessment methods.
- The Curriculum is designed using the following processes:
  - 1. Determine your vision and intention for the curriculum.
  - 2. Outline your overarching topics.
  - 3. Review any current curriculum to determine what to keep and what to retire.
  - 4. Organize your standards based on the topics and timeline.
  - 5. Write the lessons to provide a comprehensive student learning experience.
  - 6. Create or attach a variety of assessments to the lessons.
  - 7. Determine what materials and resources you'll need.

The teaching and learning strategies of the program are student-centered and encourage active learning. Mathematical science program teaching and learning strategies and assessment methods vary according to its nature and level, enhance the ability to conduct research, and ensure students' acquisition of higher cognitive thinking and self-learning skills.

As a response to the beneficiary's surveys of the Mathematical sciences program from employment agencies and graduates, the program develops its goals and learning outcomes. In addition, a training unit for graduates has been established to apply the training to align the learning outcomes of the field experience activities with the learning outcomes of the program.

#### 2. Program Regulations

Provide a list of related program regulations, including their link to online version: admission, study and exams, recruitment, appeals and complaint regulations, etc.)

• Admission and Registration Regulations

https://pnu.edu.sa/en/pages/bacaloryaprograms.aspx

## H. Program Quality Assurance

#### **1.** Program Quality Assurance System

Provide online link to quality assurance manual

https://www.ncaaa.org.sa/Pages/default.aspx

#### 2. Program Quality Monitoring Procedures

- Mathematical Science program management implements an effective quality assurance and management system that is consistent with the institution quality system.
- The teaching staff, employee, and students participate in planning, quality assurance, and decision-making processes.
- The program management approves key performance indicators that accurately measure the program performance and coordinates to provide regular data on them. The program analyzes the evaluation data annually (e.g., performance indicators and benchmarking data, student progress, program completion rates, student evaluations of the program, courses and services, views of graduates and employers); and results are used in planning, development, and decision-making processes.
- The program conducts a periodic, comprehensive evaluation (every three / five years) and prepares reports about the overall level of quality, with the identification of points of strength and weakness; plans for improvement; and follows up its implementation.

#### **3.** Arrangements to Monitor Quality of Courses Taught by other Departments.

Reviewing the courses reports that are provided by another department at the end one every semester.

**4.** Arrangements Used to Ensure the Consistency between Main Campus and Branches (including male and female sections)

N/A- There are no other branches

**5.** Arrangements to Apply the Institutional Regulations Governing the Educational and Research Partnerships (if any).

# 6. Assessment Plan for Program Learning Outcomes (PLOs), and Mechanisms of Using its Results in the Development Processes

Mathematical sciences program starting to be more efficient to assess its attributes and its learning outcomes using program courses. In selecting program courses for assessment, it is critical to start with the faculty members who are more motivated. Those members not only would help to move the process forward, but also would be beneficial in the following years of assessment to train other faculty members. Assessment methods Assessment methods (or tools) are classified into two categories. Direct methods and indirect methods. Assessment requires that each attribute (outcome) is assessed by one or more direct methods, but a meaningful assessment would use both direct and indirect methods. Direct methods allow

the direct examination or observation of student knowledge or skills associated with the indicators. The indirect methods assess opinions or self-reports to indicate student abilities. Examples of indirect methods include exit interviews, alumni surveys, and archival records. Highlights of the assessment methods.

| Evaluation<br>Areas/Aspects  | Evaluation<br>Sources/References   | <b>Evaluation Methods</b>   | <b>Evaluation Time</b>      |
|--|--|---|-----------------------------|
| Effectiveness of teaching and assessment.  | Students   | Survey  | At the end of each semester |
| Verifying of<br>achievement of course<br>learning outcomes   | Program quality and accreditation unit   | Learning outcomes<br>matrix<br>General students' level  | At the end of academic year |
| Verifying standards of student achievement.  | Independent member<br>teaching staff   | <ol> <li>Check marking by<br/>an independent<br/>member teaching<br/>staff of samples of<br/>student work.</li> <li>Exchanging<br/>periodically to<br/>mark exams or a<br/>sample of<br/>assignments with<br/>faculty members</li> </ol>  | At the end of each semester |
| Planning procedures<br>for periodic review of<br>the effectiveness of<br>the course and<br>planning for its<br>development | Faculty members<br>inside the institution,<br>students, program<br>and collage quality | <ol> <li>Periodic review of<br/>courses by faculty<br/>members to discuss<br/>recurring problems<br/>to find the<br/>appropriate<br/>solution.</li> <li>Given the<br/>opportunity for<br/>students to express<br/>their views on what<br/>is taught and<br/>receive proposals<br/>and study the<br/>effectiveness.</li> </ol> | Along the academic year     |
| Evaluation of the course file  | Program quality and accreditation unit   | Check and review the course file content.   | At the end of each semester |
|  |  |   |                             |

#### **7.** Program Evaluation Matrix

Evaluation Areas/Aspects (e.g., leadership, effectiveness of teaching & assessment, learning resources, partnerships, etc.)

**Evaluation Sources** (students, graduates, alumni, faculty, program leaders, administrative staff, employers, independent reviewers, and others (specify)

Evaluation Methods (e.g., Surveys, interviews, visits, etc.)

Evaluation Time (e.g., beginning of semesters, end of academic year, etc.)

#### 8. Program KPIs\*

#### The NCAAA KPIs at the period (1440-1442) year

You can find the KPIs analysis in the following link

https://documentcloud.adobe.com/link/track?uri=urn%3Aaaid%3Ascds%3AUS%3A83 bb0349-c3a6-4bed-88e7-94a40e7da50b

| No | KPIs<br>Code | KPIs   | Target            | Measurement<br>Methods | Measurement<br>Time |
|----|--------------|--|-------------------|------------------------|---------------------|
| 1  | KPI-P-01     | Percentage of achieved<br>indicators of the<br>program operational<br>plan objectives          | 75%               | Direct and indirect    | End of the year     |
| 2  | KPI-P-02     | Students' Evaluation of<br>quality of learning<br>experience in the<br>program                 | 4                 | indirect               | End of the year     |
| 3  | KPI-P-03     | Students' evaluation of<br>the quality of the<br>courses                                       | 3.75              | indirect               | End of the year     |
| 4  | KPI-P-04     | Completion rate  | 45%               | Direct                 | Every semester      |
| 5  | KPI-P-05     | First-year students retention rate   | 50%               | Direct                 | Every semester      |
| 6  | KPI-P-06     | Students' performance in<br>the professional and/or<br>national examinations                   | 35                | Direct                 | Every semester      |
| 8  | KPI-P-08     | Average number of students in the class  | 33                | Direct                 | Every semester      |
| 9  | KPI-P-09     | Employers' evaluation<br>of the program graduate<br>proficiency                                | 4.5               | Indirect               | annually            |
| 10 | KPI-P-10     | Students' satisfaction<br>with the offered services  | 3.8               | Indirect               | annually            |
| 11 | KPI-P-11     | Ratio of students to teaching staff  | 14:1              | Indirect               | Every semester      |
| 12 | KPI-P-12     | Percentage of teaching<br>staff distribution:<br>Ph.D. Holder<br>Senior Lecturer<br>Instructor | 70%<br>18%<br>12% | Indirect               | annually            |
| 13 | KPI-P-13     | Proportion of teaching<br>staff leaving of the<br>program                                      | 1%                | Indirect               | annually            |

The period to achieve the target (5) year.

| No | KPIs<br>Code | KPIs   | Target | Measurement<br>Methods | Measurement<br>Time |
|----|--------------|--|--------|------------------------|---------------------|
